

## H2

### Ribbed tube steam and warm water heater for switchgear cabinets

Made of seamless drawn precision tube  $\varnothing 12 \times 1.5$ , steel galvanized

Designed for saturated steam 0.5 bar for a temperature difference of 30°C in non-insulated protection boxes and a temperature difference of 50°C in insulated protection boxes.

Deliverable for wall entrances GD 12 and for attachment to bulkhead fittings. We recommend our GD 12 (see „Accessories“) for temperature resistance up to 200°C and for short periods up to 250°C.

Extra equipment: Precision tube  $\varnothing 12 \times 1$  made of stainless steel

Heater as shown in drawing in other dimensions

Dimensions A and B conform  
to cabinet model and size
